FLIGHT TABLE

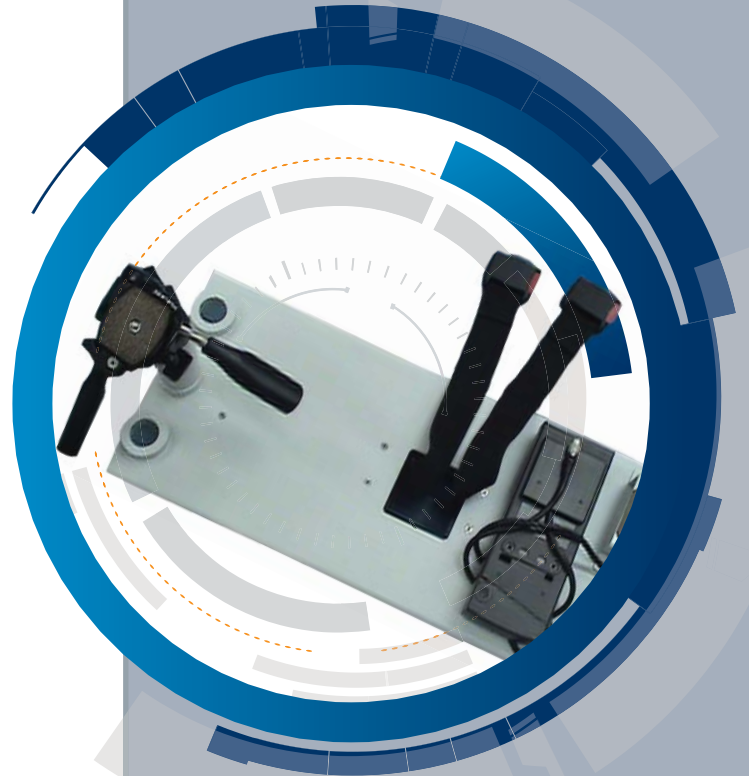

LAP MOUNT

Airborne inspection for corona can be easily done using Ofil's lap mount. The DayCor® camera is mounted on a pan and tilt structure. An adjustable handle controls the camera's directions.

Made of a sturdy metallic padded base the mount is secured with straps to the laps. The base holds a camera and optional additional devices that can be secured. Preset holes can accommodate for changeable layout arrangements or/and mounted content.

THE LAP MOUNT CONSISTS OF:

- Aluminum platform with rubber padding
- Dimensions: 53cmX24cmX5.5
- Weight: 3.5 Kg
- 1/4" mount
- Straps
- Pan and Tilt unit with a handles
